

I own 2 XM radios and listen to XM radio at least 10 hours a day both on my office and in my car. I appreciate the service provided by xm radio in regard to both the music and now the new weather and traffic services. I feel it would be a step backwards if you were to not allow this service to continue. People who us XM radio have made a choice and agree to pay for that choice. Don't take away our freedom of choice.
